EZ BoatPort™ Packages and Components

208015FT, 208015EX, 208104, 208105, 600041, 600042, 600043 and 250050-BK
BP3000, BP4000, and BP5000 series boat lifts

Implementation Date: February 2012

EZ BoatPort

Features and Benefits

Introducing the EZ BoatPort™ with air-assist and side extensions. The new EZ BoatPort components enhance the convenience of use and boat lifting capacity to a new level. The new modular 20" platform extensions provide added flotation and walk-around space while the new air-assist flotation tank with easy to use controls boost the boat lifting capacity to 5000lbs. The air-assisted units offer a choice of control units that include: standard AC powered pump with manual controls; DC battery powered pump with solar charging system and manual controls (deep cycle battery not included) and an AC powered remote control pump unit. In the future a DC remote controlled pump unit will be offered. All EZ BoatPort components are offered separately or by approved packages (shown on pages 9-14).

- Drive-On System– Allows for positive contact between the boat and lift for stable porting in strong current or windy conditions
- Bunk Options– With two adjustable bunk options the EZ BoatPort is designed for V-hull, flat bottom, or jet boats
- Air-Assist Pump Unit– There are three air-assist pump unit options available: standard AC powered pump with manual controls; DC battery powered pump with solar charging system and manual controls (deep cycle battery not included); and an AC powered remote controlled pump unit. All pump units provide easy, hassle free operation with an approximate lift time of 30-90 seconds.
- Patent Pending Lift Design for boats up to 5000lbs. For EZ BoatPorts without air-assist a minimum water depth of 20" is required and for EZ BoatPorts with air-assist a minimum water depth of 36" is required.
- Versatile mounting options allow for multiple installation methods.
- Modular System– Allows for expanding or reconfiguring your boatlift/dock by simply adding components. Can be used with standard EZ Dock, traditional floating or fixed docks.
- Complete Platform Design– Safe and Easy to use without any open areas or exposed metal.
- Durable– Made completely out of marine grade materials.
- Accessibility– Side extension options offer three sided accessibility for easy access to clean or cover your watercraft.

Product Announcement

208015FT FLOAT TANK, AIR-ASSIST KIT for EZ BoatPort

Shipping Weight- 240 lbs.
Part Dimensions- 78"W x 111"L x 20" H
Floataion Capacity- 2000 lbs.

The EZ BoatPort Float Tank can be added to the EZ BoatPort, allowing it to increase the flotation capacity up to 4000 pounds. The combination of two Side Extension and a Float Tank added to a EZ BoatPort will allow up to a 5000 pound watercraft to be ported (depending on the weight distribution). This will more than double the weight of the watercraft that can be added to the EZ BoatPort.

Product Announcement

208015EX EXTENSION, EZ BoatPort SIDE KIT

Shipping Weight- 140 lbs.
Part Dimensions- 19.5"W x 164"L x 15" H
Floatation Capacity- 500 lbs

The EZ BoatPort Side Extension can be added to one or both sides of the EZ BoatPort, making the lift either 100" (with one Side Extension) or 120" wide (with a Side Extension on each side). Each Side Extension has a flotation capacity of 500 pounds. This will allow for a larger platform that will provide more area for wider boats, additional walking surface, increased flotation capacity and added versatility for a wider array of installations/applications.

Note: For watercraft in excess of 3000 lbs. the EZ BoatPort side extensions must be used in pairs to ensure proper weight and balance.

208104 CONNECTOR, KIT EZ BoatPort POLY H-CONNECTORS

Shipping Weight- 33 lbs.
 Part Dimensions- 13.5"W x 15"L x 12" H

The H-Connector Kit for the EZ BoatPort is designed to attach the Side Extension to the EZ BoatPort. It also replaces the T-Connector when a Float Tank and Side Extension are used in conjunction. This kit comes with an H-Insert, coupler sets and all hardware needed for proper installation of one EZ BoatPort Side Extension.
