

EZ Dock

Utility Stands

EZ Dock Mid-Atlantic is pleased to announce the availability of our new utility stands for EZ Dock installations as well as wood or metal docks.

Dock Shower Stand

The Dock Shower Stand is a marine grade polished aluminum accessory designed to attach to an EZ Dock System with one EZ Dock hardware connector. This accessory also can be ordered for mounting on a wood or metal dock. The Dock Shower Stand simply needs a garden hose attached to the bottom supply which is under water and you instantly have water at the lower spigot level with a hose bib as well as at the shower head using a separate shut off value.

Part Numbers: MA-SS (EZ Dock), MA-SSw (Wood dock)

Dock Shower Stand

Rescue Ring Stand

The Rescue Ring stand is made of polished marine aluminum and is delivered with an arm to store rope and a rescue ring anywhere on the EZ Dock System. One EZ Dock hardware connector is required to attach to an EZ Dock system and it is also available with a mounting plate for wood or metal docks.

Part Numbers: MA-RRS (EZ Dock), MA-RRSw (Wood dock)

Rescue Ring Stand

Water Stand

The Water stand provides water at the dock and uses a standard EZ Dock hardware connector to attach to the dock. Simply run a garden hose to the connection at the bottom of the water stand, connect the stand to the dock and you have fresh water for all those requirements (fish cleaning, boat washing, etc.). The stand comes with a hose bib for storing a hose as well. Anchoring uses one EZ Dock hardware connector. This is a marine grade polished aluminum accessory which can also be mounted on wood or metal docks with the wood anchoring plate.

Part Numbers: MA-WS (EZ Dock), MA-WSw (Wood dock)

Water Stand

Utility Stand

Utility Stand

The Utility Stand provides a GFI power source on the dock as well as water and a hose bib. For those customers that want both power and water the Utility Stand answers the requirement. This polished aluminum grade Utility Stand attaches using a standard EZ Dock hardware connector and power (shipped by default with 20 Amp receptacles) can be run from shore to the Stand as well as water. A simple garden hose can be attached to the bottom of the water supply and any underwater power cable can be used to supply power to the receptacle.

Part Numbers: MA-US (EZ Dock), MA-USw (Wood dock)
